

BAKUCHIOL

(pronounced:bah-koo-chee-ole)

The natural alternative to retinol with no side effects!

Bakuchiol is a phytochemical derived from the babchi seed, an herb used in Chinese medicine (*Psoralea corylifolia*). This ancient plant has been used for many centuries to reduce inflammation and treat a number of skin conditions, including psoriasis, leukoderma, vitiligo, and eczema. Bakuchiol possesses anti-inflammatory, anti-bacterial, and antioxidant properties.

(Alam, Khan, & Asad, 2018)

Studies showed that, applied twice-a-day for 12 weeks, Bakuchiol provokes a significant improvement in lines and wrinkles, pigmentation, elasticity, firmness and overall reduction in photo-damage, without usual retinol therapy-associated undesirable effects. In addition, Bakuchiol is likely the only agent after retinoic acid shown to be effective against multiple pathophysiologic features of acne.

(Ratan K. Chaudhuri, K. Bojanowski 2014)

The Results

- * Reduction in fine lines and wrinkles
 - * Faded dark spots
 - * Brighten dull skin
- * Smoother skin texture
- * Assist in healing acne

Additional Active Ingredients

- *Niacin (B3)
- *Green Tea Leaf Extract
- *Peptides
- *Hyaluronic Acid
